

***Variant of Concern***

It has been confirmed that the student that was in the Manor had a variant of concern. As was shared last week, the student did not interact with any residents. However, this means that we will be testing all residents twice per week instead of weekly to ensure that there has not been any spread.

***Visiting Guidelines for Essential Caregivers***

As you can appreciate, the Ministry of LTCs guidance around visiting policies has been constantly changing. We have been doing our best to stay on top of the various changes.

As such, I wanted to clarify that in the grey, red or orange zones during outbreak, as long as appropriate testing and screening has been conducted, either of the resident's essential caregivers can visit, however they cannot visit at the same time.

General visitors are not permitted to visit.
